INDUSTRIAL MINERALS SINCE 1897

WHITE PAPER COATING CLAY

This is very white, Calcined Kaolin. It is used for filling and coating application in newsprint, coated ground wood, coated and uncoated free sheets, and top white linerboard. It can reduce the TiO₂ demand.

Physical specification	Typical Value
Brightness	92.5 GE
Finer than 2 micron	94%
PH	6.5
Residue on 325	0.005
Slurry	up to 50% solids
LOI	0.5%
Einlehner abrasion 100 K	13

Advantages:

- Reduces TiO₂
- Improved print appearance and strike through
- Improved brightness
- Improved ocapacity
- Improved printability

Pack: Super sacks, pulpable bags, and slurry

Origin: USA
