FDA BACTERIA GUIDELINES

FDA quality is for use where total microbacterial levels must be limited and guaranteed below the typical limits of good manufacturing practices or below the levels of the compendial specifications. When applied to a USP certified material, the FDA conformation will meet both the USP chemical specification and the following bacteria levels:

FDA BACTERIA GUARANTEED SPECIFICATIONS:

Total plate count	Less than 100, typically zero
Gm neg. count	Zero
Mold count	Zero
Yeast count	Zero
