INDUSTRIAL MINERALS SINCE 1897

GEMSTONE AMETHYST QUARTZ

This mineral is crushed from the finest & darkest South American Amethyst. It is carefully processed into a fine, just palpable, grain size. This grade is devoid of respirable sized particles (less than 10 micron) and so presents no respirable free silica hazard.

CHEMICAL ANALYSIS:

SiO ₂	Major 99%
Iron	Minor yields the purple color
Other Metals	Trace

PHYSICAL ANALYSIS:

Appearance	Purple or bluish grains
Partical size	60/180 mesh 250 - 80 micron
	less than 0.1% less than 10 micron

PACKING:

Drums

ORIGIN:

S. America, USA Processed
