INDUSTRIAL MINERALS SINCE 1897

ABRASIVE GLASS

This material is used for blast finishing of various metals. It is carefully screened to both maximum and minimum size. It has thousands of very sharp edges and points which provide its unique performance.

CHEMICAL ANALYSIS:

SiO ₂	72.5%
Na ₂ O	13.7
CaO	9.75
MgO	3.3
K ₂ O	0.1
Others	approx 0.25%

PHYSICAL ANALYSIS:

Specific Gravity:	2.5	
Softens at	730 Celsius	
Odor	None	
Appearance	off white powder or small grains	
Nominal size	90+% 600-200	
<u>Mesh</u>	<u>Micron</u>	<u>% retained</u>
30	600	0.3%
40	425	24.4
50	300	59.6
60	250	91.5
80	180	98.9

PACKING:

50 lb Paper bags on wooden pallets with plastic wrap

ORIGIN: USA
